- Mix Ratios: Typical ratios include 1:4 (cement:sand) for general purposes

Mortar Mixing and Handling

- Mix thoroughly to achieve uniform consistency
- Use clean water and materials
- Avoid over-wetting or under-mixing

Applying Mortar

- Spread mortar evenly on the bed and perpend
- Use a trowel to shape joints and ensure good contact
- Maintain consistent joint thickness as per project specifications

Introduction to Plastering

Plastering covers internal and external surfaces to provide a smooth, durable finish. Mastery of plastering involves understanding different types of plaster, preparation, and application techniques.

Types of Plaster

- Gypsum Plaster: For internal walls; quick setting
- Cement-Based Plaster: Suitable for external surfaces
- Lime Plaster: Flexible and breathable, used historically and for restoration

Preparation of Surfaces

- Clean and dampen surfaces before plastering
- Remove loose particles, dust, or debris
- Apply a bonding agent if necessary

Application Techniques

- Use hawk and trowel to apply plaster
- Work in layers, typically two or three coats
- Ensure even thickness and smooth finish
- Use float to achieve a flat surface

Safety and Quality Standards

Adherence to safety protocols and quality standards ensures both worker safety and the longevity of the work.

Safety Measures in Bricklaying and Plastering
