- No-Cloning Theorem: Ensures that the original quantum state is destroyed during the teleportation process, maintaining the integrity of quantum mechanics principles.

- Teleportation Protocol:

- Alice and Bob share an entangled pair.
- Alice performs a Bell-state measurement on her part of the entangled pair and the unknown state.
- Alice communicates her measurement result classically to Bob.
- Bob applies a corresponding unitary operation to his qubit, recovering $|\psi\rangle$.

Mathematical Formalism
